Family medicine (FM), formerly family practice (FP), is a medical specialty devoted to comprehensive health care for people of all ages; the specialist is named a family physician or family doctor. In Europe the discipline is often referred to as general practice and a practitioner as a general practice doctor or GP; this name emphasises the holistic nature of this speciality, as well as its ...

Family medicine - Wikipedia
An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.

Currently skill mix in primary care includes a number of different non-physician health professionals summarized in Table 1a, Table 1b. While there appears to be general agreement that transformation to multidisciplinary teams is necessary, the approaches to implementing primary care teams are highly varied (Bodenheimer and Laing, 2007, Nelson et al., 2010, Smith et al., 2010).
