Embodied Cognition. This is in part because of the rich range of phenomena that embodied cognitive science has studied. But it is also in part because those phenomena are often thought to challenge dominant views of the mind, such as the computational and representational theories of mind, at the heart of traditional cognitive science.

### **Embodied Cognition (Stanford Encyclopedia of Philosophy)**

In this Book. Through this cross-fertilization of disparate fields of study, *The Embodied Mind* introduced a new form of cognitive science called "enaction," in which both the environment and first person experience are aspects of embodiment. However, enactive embodiment is not the grasping of an independent, outside world by a brain, a mind,...
